

RM Manage System

Project System

Project is a subteam, it has the following features

- Announcement: project announcement
- Budget and Purchase: each member send out a purchase request, the manager or leader need to review the request based on the budget
- Calendar: development timeline, weekly / bi-weekly meeting, schedule
- Assignment: submitting assignment / your work

Each project has three roles:

- Leader (only one, must be the creator, cannot change)
- Manager (assigned by the leader, have the same privilege as leader except adding new member)
- Member (General developer in the project)
